

ALI SHAER M.Sc. Information Systems

Haifa, Israel · 0526137775 · Shaer.ali.gr@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

Information Systems graduate specializing in AI, with hands-on experience in machine learning, NLP, LLM-based systems, data analysis, and software development. Currently pursuing an M.Sc. focused on large language models and AI-supported learning.

EXPERIENCE

Co-Founder - MyPsychometric | 2025–Present

- Co-founded and developed an AI-powered psychometric preparation platform.
- Designed and implemented an LLM-based multi-agent system for exam-question generation, tutoring, and personalized learning workflows.
- Developed the platform frontend in React and integrated the AI system into the user-facing application.

Teaching Assistant & Excellence Tutor - University of Haifa | 2021-2026

- Tutored students in machine learning, programming, OOP, and technical problem solving.
- Reviewed assignments, debugged code, and provided structured technical feedback.

Researcher - LLM-Based Educational Systems, University of Haifa | 2024-2025

- Designed LLM-based educational agents and experiments for studying hypothesis formation, reflection, and scientific inquiry.
- Built experimental interfaces and data pipelines using GPT models, prompt engineering, structured outputs, and automated evaluation.

AI Instructor & Project Mentor - Magshimim AI | 2021-Present

- Teach AI and programming topics to high-school students through structured lessons, exercises, and hands-on technical work.
- Mentor students through final AI projects, meeting weekly to review progress, troubleshoot technical issues, and provide guidance on improving their solutions.
- Support students in project planning, implementation, experimentation, and presentation of their final work

EDUCATION

M.Sc. Information Systems, University of Haifa - Expected 2027

Research focus: NLP, LLMs, and AI-supported education.

B.Sc. Information Systems — AI Track, University of Haifa -

GPA: 85

TECHNICAL SKILLS

Languages: Native or native-like fluency in Arabic, Hebrew, and English.

Programming Languages: Python, Java, C, SQL

AI / Data: Machine Learning, NLP, LLMs, Hugging Face, Pandas, NumPy,

Tools: Git, Firebase, Firestore
